PLANETS in the BODY : The Archetypes of health

1. **SUN** : LIFE FORCE / HEART / CIRCULATION / EYES / WARMING
2. **MOON**: MUCOSA , the fluid moat / BREASTS/STOMACH / BRAIN / EYES /
3. **MARS**: BLOOD / FEBRILE, venting fever response / ADRENALS, fight flight freeze / IMMUNITY / PROSTATE/ MALE REPRODUCTION /
4. **VENUS**: KIDNEYS / SKIN / HORMONES / URINARY TRACT /
5. **JUPITER**: LIVER / fats and oils , adipose tissue
6. **SATURN** : TEETH / TENDONS / BONES / GALL BLADDER / SPLEEN
7. **MERCURY**: RESPIRATION / NERVOUS SYSTEM / SKIN
8. **NEPTUNE**: LYMPHATICS, inner ocean / IMMUNITY
9. **URANUS**: NERVES / TRAUMA ENDURED , the unforeseen

ZODIAC in the BODY

PHYSIOLOGY CORRELATED TO THE GALACTIC ZODIAC

Aries

Brain, cerebral hemispheres, cranium, eyes, face, upper jaw, internal carotid arteries, thalamus, adrenals.

Taurus

Neck, throat, palate, larynx, tonsils, lower jaw, ears, occipital region, cerebellum, atlas, axis, external carotid arteries, jugular veins, pharynx, thyroid gland, cervical vertebrae.

Gemini

Shoulders, arms, hands, upper ribs, lungs, trachea, bronchi, capillaries, breath, oxygenation of blood.

Cancer

Stomach, esophagus, diaphragm, breasts, nipples, lacteals, upper lobes of liver, thoracic duct, pancreas, serum of blood, peristalsis of the stomach, gastric fluids, pituitary.

Leo

Heart, dorsal region of spine, spinal cord, aorta, superior and inferior vena cava, thymus.

Virgo

Abdominal region, large and small intestines, lower lobe of liver, spleen, duodenum, thymus secretions, peristalsis of the bowels, pancreas.

Libra

Kidneys, adrenals, lumbar region, skin, ureters, vasomotor system, medulla, ovaries.

Scorpio

Bladder, urethra, genitals, descending colon, prostate gland, testes, sigmoid colon, nasal bone, pubic bone, red coloring matter in blood.

Sagittarius

Hips, thighs, femur, ileum, coccygeal vertebrae, sacral region, sciatic nerves, pelvic ischium.

Capricorn

Skin, hair, knees, joints, skeletal system.

Aquarius

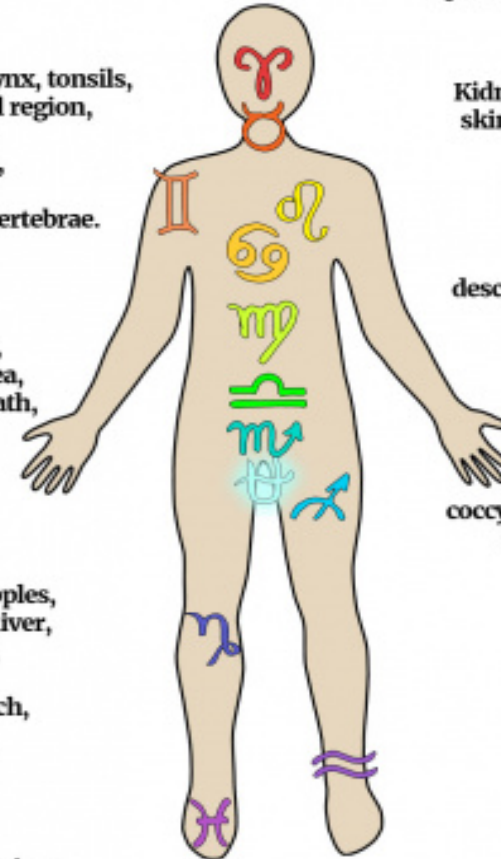

Ankles, lower limbs, circulatory system.

Pisces

Feet, toes, lymphatic system, adipose tissue, fibrin in blood, pancreas.

Ophiuchus

Fetal cells, tailbone, cranial sacral axis, solar sacrum, kundalini, amrita, lyden gland, base of brain (golden chalice), lunar to solar transfiguration.

Celestial MRI SCAN : Splitting Hairs

each degree of that sign is attributed a different portion therein. Lets look at **Scorpio, the Genitals, as an example:**

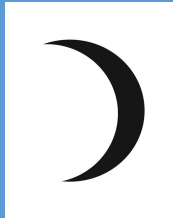

- **Scorpio degree 1:** Urethra Opening
- Scorpio2 :** Urethral Meatus
- Scorpio3 :** Prostate, Uterus
- Scorpio4 :** Testicle, Right Side Of Uterus
- Scorpio5 :** Testicle, Left Side Of Uterus
- Scorpio6 :**Right Epididymis Uterine Cavity
- Scorpio7 :**Left Epididymis , Right Fallopian Tube
- Scorpio8 :**Scrotum , Left Fallopian Tube
- Scorpio9 :**Spermatic Duct, Vagina, Alcoholism
- Scorpio10 :** Corpus Cavernum Oseum Neurasthenia
- Scorpio11:** Penis , Labor Majora
- Scorpio12:** Seminal Vesicles

1) 4 foundational qualities

- Fast vs. Slow
- Tense vs. Relaxed
- Dry vs. Wet
- Hot vs. Cold

The Traditional Benefics: Venus and Jupiter and Moon are of a more balanced mixture of these qualities and produce mild medical results. As such they are more conducive to sustained life and health, but can be bringers of illness, too.

The Traditional Malefics: Mars, Saturn, Sun, and the Nodes are of a polar extreme nature that has intense medical repercussions. As such they are not conducive to life, and are happy to take the life force from the native. These are the primary concerns of medical astrologers.

SECT:

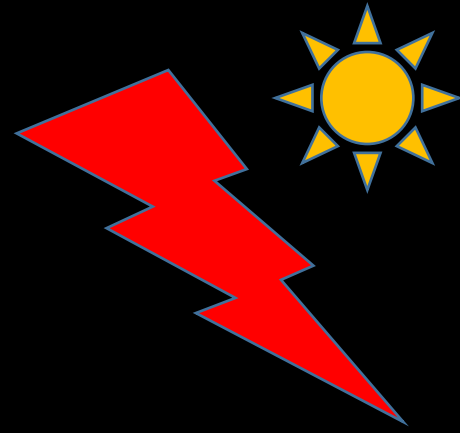

Determines the Chief Benefic and Malefic

- **DAY PLANETS:** SUN + JUPITER + SATURN
+ MORNING STAR MERCURY

Cold Saturn is less bad during the warmth of the day. Therefore Mars will be worse for people born during the day (sun above horizon).

- **NIGHT PLANETS:** MOON + VENUS + MARS
+ EVENING STAR MERCURY

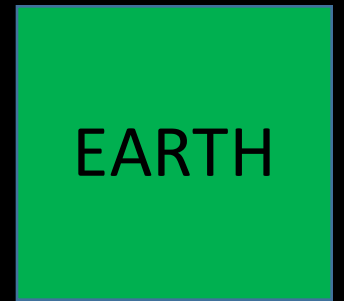

Hot Mars is less bad during the coolness of night. Therefore Saturn will be worse for people born at night (sun below horizon)

**Fire is the King of the
Generative Cycle**

Fire must Fetch out Fire

**Every disease
Has its axis in Fire**

SATURN

- COLD - DRY -TENSE – HARD—SLOW
- Mostly Chronic cold conditions, the limit of the life force
- Can give heat conditions, by storing/containing toxins in blood
- (hates water signs, putrefies the waters of the body)
- Gives diseases that require responsibility to stay alive
- Astringent in the body, clearing congestion, giving strength
- DRAIN THE SWAMP! ...Of wet conditions.
- Psychological Heaviness and inescapable problems, “what’s the point in getting better?”

MARS

- FAST– DRY– HOT– TENSE– LIQUID
- The catalyst of the body, destroys red blood cells to make them anew in spleen, allows us to break down foods in the small intestines.
- Alarm system of the body-inflammation and rules bitter things, which is a warning bell of danger in chemical structure.
- Makes visible heat diseases, but can cause cold illnesses by dispersing or burning up life force through heat misdirection. (water signs, force is boiled off)
- Often intolerable or acute in nature, prompting hasty action to remedy “I must get better!”

North Node + South Node

- The “knots” of the body. These reveal genetic or karmic illnesses that are otherwise difficult to explain. What we inherit and leave behind in the bodies of our children.
- North node: rules the mouth, excesses, father genes, obsessions,
- South node: rules anus, deficiencies, dissolution, mother genes, apathy
- When these knots are with the planets, the planets do not behave predictably. Especially in the houses of aversion: 6,8,12 or along the ascendant, or when born under the effects of an eclipsed lunation.
- NO surgeries on Eclipses! The lifeforce will eject through the dragon gates

ATMAKARAKA: Sun's Cycle

- The transit sun's relation to the patient's Natal sun will reveal basic life force quality.
- Sun in opposition: Visible problems/ Low energy / Low will/ Poor testament
- Sun in Aversion/Quincunx: Don't release from care/ response to medicine will be misleading/ evolving diagnosis
- Sun square: Hidden problems, problems arise upon treatment, difficulty in adherence, resentment of caregiver, denial of disease, raw pain
- Sun trine: healing, ease of care, passivity, receptivity, lower doses, faster results, but also faster death if imminent. Open cooperation with spiritual forces.
- Sun sextile: hidden administrative assistance, successful but slower

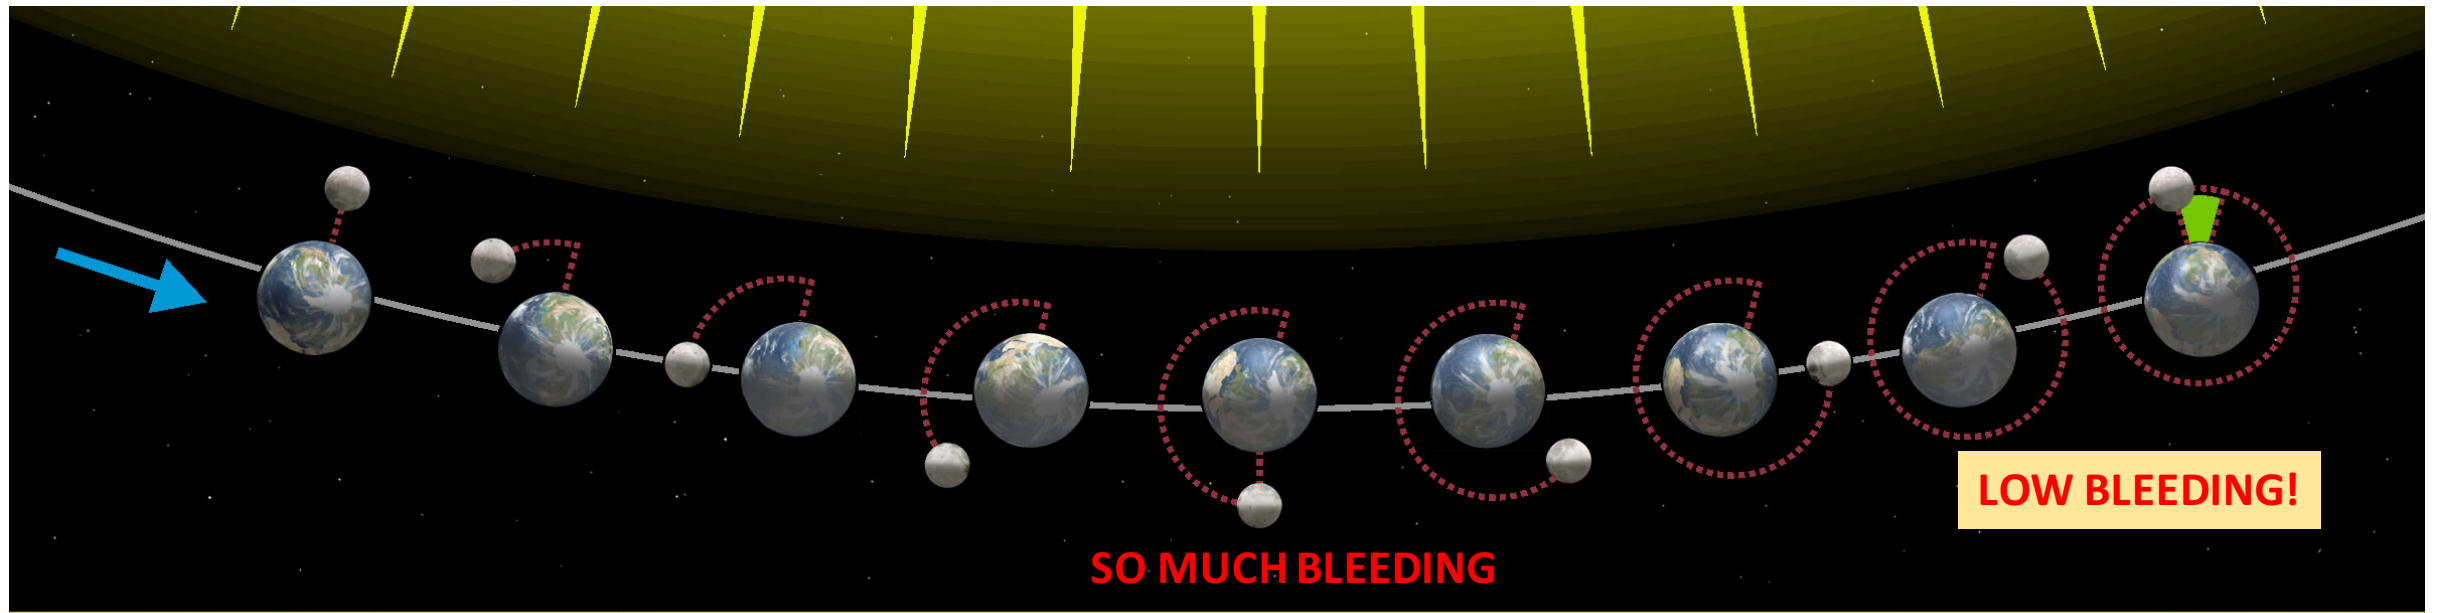

CHARA ATMAKARAKA

The governor or speaker of the solar life force within the body, will very often be heavily involved in the death chart as it also acts as a sort of psychopomp.

Most advanced planet by Degree

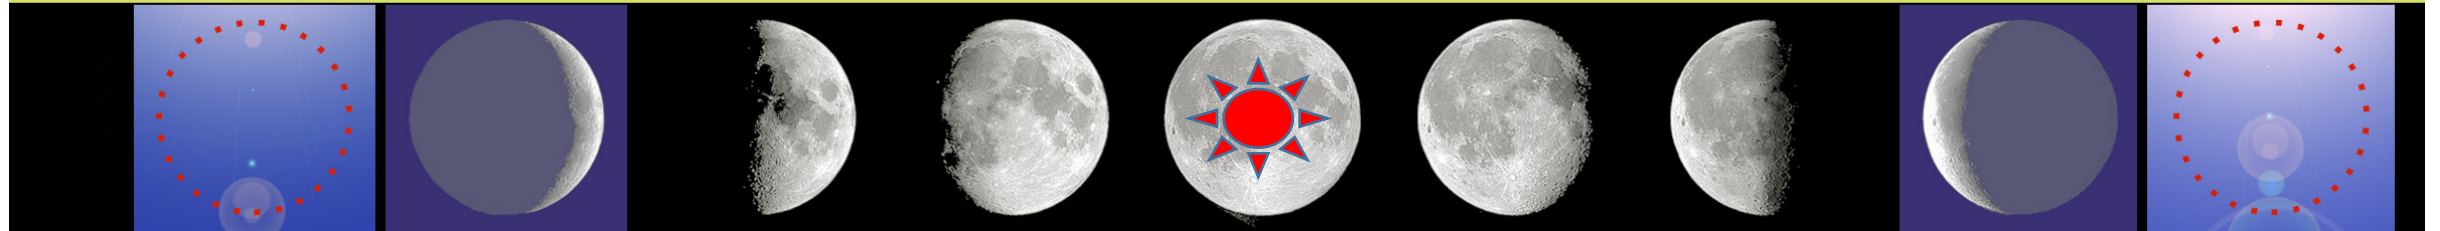

Moon Phase : Critical for Herb Administration

- Waxing: Increase that Tissue or Physiological Effect
- Waning: Decrease that Tissue or Physiological Effect
- Whatever sign the moon is in, that part of the body will experience fluid sensitivity. Fluids are how we give medicine. So treat that part of the body!
Example: Moon in Aries: Give herbs for headache / eye-strain
- for this same reason: cutting or surgery on the part of the body represented by the moon's transit zodiac sign will result in a bloody mess or increased pain and inflammatory reactivity. Don't do it! *Moon in Gemini or Aquarius: don't give Intravenous needle! Moon in Aries: Don't do brain surgery!*
- Balsamic Moon Phase (45-90degrees behind sun): Best for low blood loss during surgery, a time for healing and regeneration.

Moon + Planet = Treat It to Defeat It!!

- Better than the planetary hours, when the moon conjoins a particular planet, treat the conditions associated with the nature of that planet. In this way, the treatment will be expedited and potentiated.
- *Example: Moon conjoins Saturn in Capricorn:* Give castor oil (pungent warming oil) compress on osteoarthritic (cold saturn condition) of the Knees (capricorn zone)

MOON SIGN > MOON PHASE

THESE QUARTERS OF THE MOON
ARE DIAGNOSTIC ANCHORS
TO DETERMINE OUTCOME OF
DISEASE PROGRESSION

EXAMPLE: IF a fever begins on the waxing moon,
The body will provide a tissue-environment or
Fluid environment that increases the pathogen
And its grip on the life force and it will more
Serious and slower to resolve.

If a fever begins in a waning phase,
The body's environment will not allow the
Pathogen to grip the patient, and the fever
Will be easier to manage and faster to dissolve.

CRITICAL DAYS OF THE MEDICAL MOON

according to Sahl Bin Bishr

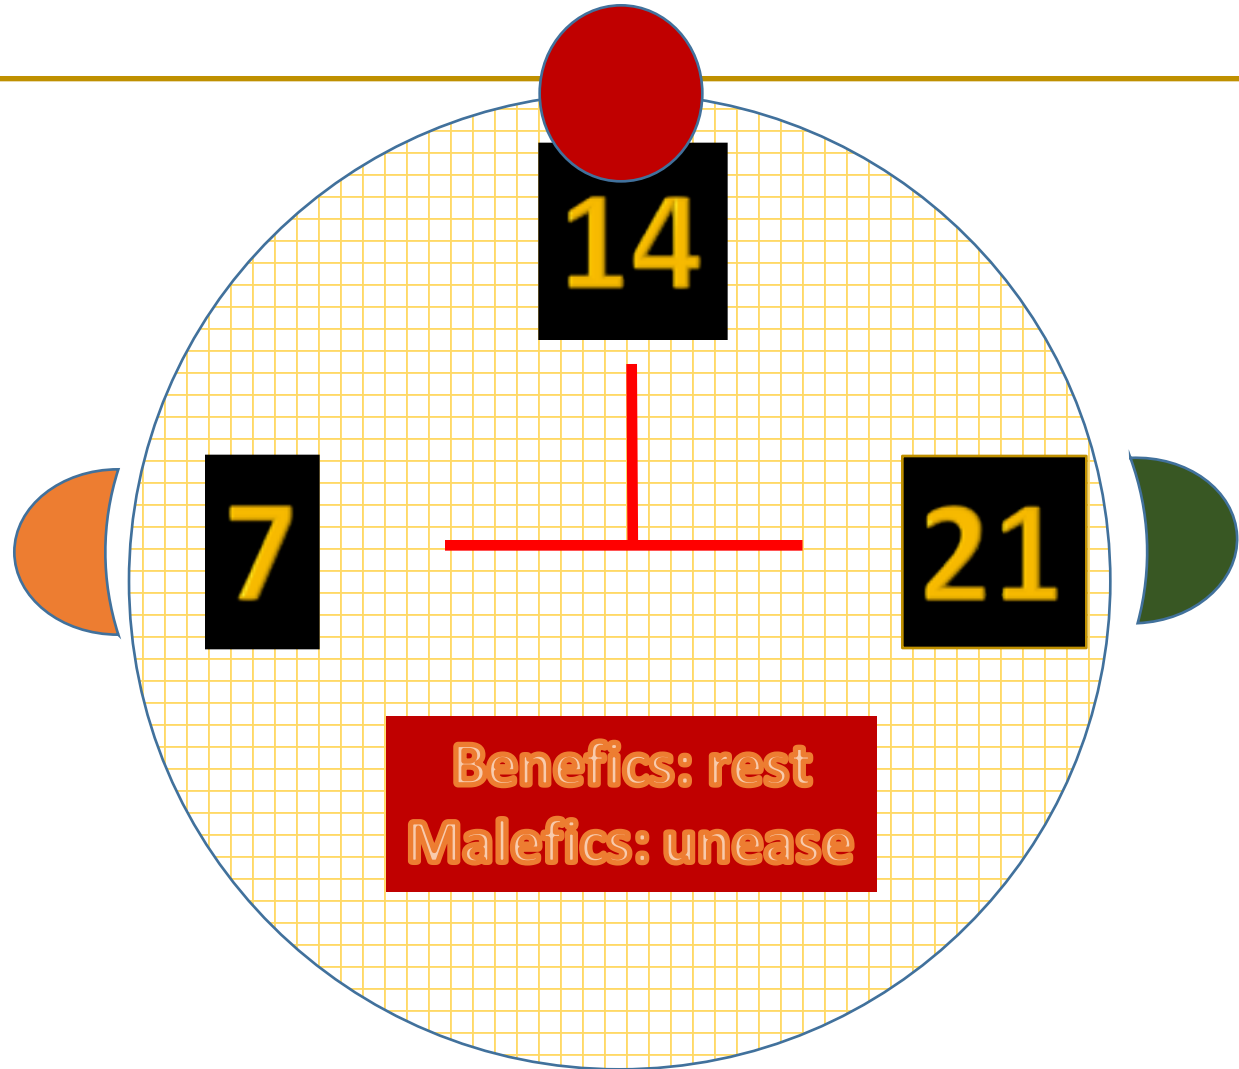

AT THE START OF SYMPTOMS

<Or at the Time the Client Asks the Question (Prashna)>

Look at the sign, and lord of that sign, of the moon's transit at:

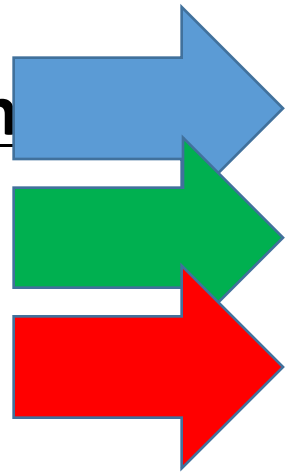

7 , 14, and 21 days after Inception

Look at these planetary Lords and evaluate their condition in the Illness inception chart
To understand the nature of the illness, its course, and potential

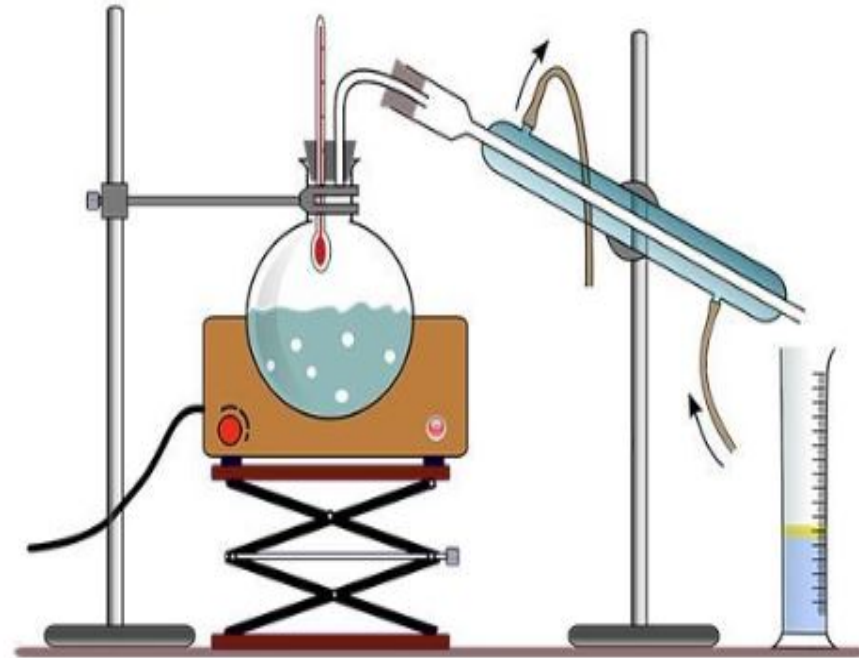

The Procedure of 7 in the Spagyric Method

- 1) Calcination
- 2) Dissolution
- 3) Separation
- 4) Conjunction
- 5) Fermentation
- 6) Distillation
- 7) Coagulation

DOCTOR **vs** PATIENT : SYNASTRY

- There are instances when a doctor should not work with or operate on a patient due to astrological influences. In the cases of the nodes, karma can cause a surgeon to kill a patient even if he is doing his otherwise best at the procedure. In general the Dr.'s Mercury or Mars should not be in conjunction with or squaring one of the nodes of the patient's nativity. Mars will cause malpractice. Mercury will cause misdiagnosis or administrative and electronic failures. These are conditions too unpredictable for guaranteed success at treatment.
- Venus /Jupiter/Mercury in relation by trine or sextile can bring good results for both parties.

SENSORY ENERGETICS (RASA)

SWEET: WATER + EARTH= SLOW/ WET/ COLD

SOUR: EARTH + FIRE = FAST/ WET/ HOT

SALTY: FIRE + WATER= FAST/ WET/ HOT

BITTER: AIR + ETHER= SLOW/ DRY/ COLD

PUNGENT: FIRE + AIR= FAST/ DRY/ HOT

ASTRINGENT: AIR + EARTH= SLOW/ DRY/ COLD

The Color Cure

- If colors are photons, products of dispersed light. Then disease is an excess or deficiency of light spectra. Gemstone remedies are given which contain and harness that specific spectrum of light to the good or ill of the patient. Gemstones must be taken very seriously, and must be in flawless condition with the appropriate number of facets set in the appropriate metal (alchemy). You should be speaking to an Indian Astrologer if you want to see astrological remedies that are time-tested.
- SATURN: VIOLET : *SAPPHIRE*
- MERCURY: GREEN: *EMERALD*
- JUPITER: BLUE : *TOPAZ*
- VENUS: INDIGO : *DIAMOND*
